<sup>\*</sup>Estimated exposure only includes population within the map area.

## Population Exposure

population per 1 sq. km from Landscan

#### PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty. https://earthquake.usgs.gov/earthquakes/eventpage/us7000645k#pager

## **Structures**

Overall, the population in this region resides in structures that are a mix of vulnerable and earthquake resistant construction. The predominant vulnerable building types are unknown/miscellaneous types and heavy wood frame construction.

### **Historical Earthquakes**

| Date       | Dist. | Mag. | Max       | Shaking |
|------------|-------|------|-----------|---------|
| (UTC)      | (km)  |      | MMI(#)    | Deaths  |
| 1977-03-18 | 215   | 7.2  | VII(520k) | 1       |
| 1999-12-11 | 335   | 7.2  | VIII(17k) | 1       |
| 1990-07-16 | 192   | 7.7  | IX(893k)  | 2k      |

Recent earthquakes in this area have caused secondary hazards such as landslides and liquefaction that might have contributed to losses.
